---

---

## RECENT PROJECTS

---

### Shopping List Web Application:

- A web application that allows users to create shopping lists, check off items, delete and/or clear all checked items, and set custom colors for each list. Developed as a team Git project using a single Github repository
- Technologies used: Java, HTML, CSS, Bootstrap, Spring, Thymeleaf, Gradle, Heroku, ClearDB, MySQL, Git/Github

### Small Group CRM Web Application:

- A web application with admin and user roles that allows a user to edit their profile and view other contacts in their group. It also allows an admin to create, read, update, and delete users and groups
- Technologies used: Java, HTML, CSS, Bootstrap, Spring, Thymeleaf, Gradle, Heroku, SQL, Git/Github

### Inventory Web Application:

- A web application that allows a user to create, read, update, and delete customers and products. The user can also view and delete transactions and upload images to the user profiles
  - Technologies used: Java, HTML, CSS, Bootstrap, Spring, Thymeleaf, Gradle, Heroku, SQL, Git/Github
-
